

MAXIMUM PERFORMANCE.

6 TIMES FEWER CALL-BACKS.
OVER 10 BILLION FEET OF SPACER.

UNDENIABLY THE BEST.

No other spacer even approaches Intercept's performance record. And it's the number-one choice for the best reasons in the business:

Patented U-Shape

Construction makes it the most durable and flexible thermal cycling alloy spacer. No load on the sealant virtually eliminates seal failures.

Best Gas Retention is achieved with the industry's longest Moisture Vapor Transmission path by up to 50%. Combined with our corner technology, seal failures and gas loss are virtually eliminated.

Superior Warm-Edge Performance assures it meets or exceeds all U.S. Energy Star® and worldwide energy ratings requirements.

Straightest Grids in the industry and spacer tucked below the sightline give it the best aesthetics, hands down.

Strongest Corners Available result from continuous spacer and the four-layer protection of our exclusive Quad Corner™ design.

And all 10 billion-plus feet have been made on the most proven IG spacer system in the world. See for yourself why it's far and away the industry leader. Visit www.interceptspacer.com.

Intercept. Absolute maximum performance.
