

WE **DIDN'T SAY** WE'RE

**YOU DID.**

**INTERCEPT IS PREFERRED 3 TO 1  
OVER ANY OTHER SPACER SYSTEM  
IN NORTH AMERICA.**

More people in more places choose Intercept to grow their bottom lines, not to mention protect their windows from the harmful effects of nature. The five main reasons are:

**Patented U-Shape Construction** makes it the most durable and flexible thermal cycling alloy spacer without sacrificing strength. No load on the sealant virtually eliminates seal failures.

**Unrivaled Profitability** for you and your customers. More upsale options in replacement windows with the fewest callbacks in the industry makes Intercept your #1 choice.

**Superior Warm Edge Performance** for maximum thermal protection has been proven in independent testing. Claims by other spacer systems are all hot air.

**Best Gas Retention** is achieved with the industry's longest MVT path by up to 50%. Combined with our Quad Corner™ design with no gaps, gas loss is virtually eliminated.

**Better Looking Windows** with the spacer tucked below the sight line and the muntins locked securely and perfectly aligned every time.

To learn the surprising statistics behind Intercept's incredible success and popularity with leading window manufacturers and their customers, visit [www.interceptspacer.com](http://www.interceptspacer.com) or call **330.963.5401** today. When it comes to profitability, we've got your number.

***Intercept. Absolute maximum performance.***
