

# We've got you covered.

## **GED gives you efficiency with every step of our green manufacturing process.**

Our unique green technology benefits your entire operation – as well as your customers and the environment. Nothing else in our industry even begins to measure up to that absolute advantage. GED i-3™ Smart Plant Technology conserves energy, significantly reduces water usage, and minimizes scrap and waste all around. To maximize your share of today's green market, our exclusive Intercept® spacer system with Warm-Edge™ Technology lets you make and sell the most dependable energy-efficient green windows anywhere. And for solid expert advice on going leaner, greener and cleaner, look no further than GED – the industry's most knowledgeable source.
