

LeanNET® File Manager

For all your interface needs

The screenshot displays the main interface of the LeanNET File Manager. At the top, it shows the title bar 'LeanNET File Mgr' and a menu bar with 'File', 'Setup', and 'Help'. The main area features the large text 'File Mgr i3'. Below this, there are controls for 'Interval' (Minutes: 0, Seconds: 10) and 'Service' (Start/Stop buttons). A table of rules is visible, with columns for Name, Type, Description, GED Filter, Input Directory, and Output Location. At the bottom, there are buttons for 'New', 'Edit', 'Delete', 'Manual Generate', and 'Hide'. On the right side, several configuration windows are shown, including 'Output Printer' settings, 'Input File Source Directory', 'Processing Options', and 'GED File Filter' configuration.

FEATURES

- ▶ Simple rules based setup. External machines, Reports / Labels and GED file conversions are simple and easy to setup and configure.
- ▶ Individual "Rule Management", allows unparalleled flexibility.
- ▶ GED's "Hide" feature, automates rule processing without cluttering the desk top.
- ▶ GEDs Customer Specific "Task" dlls and GED Report and Label templates.

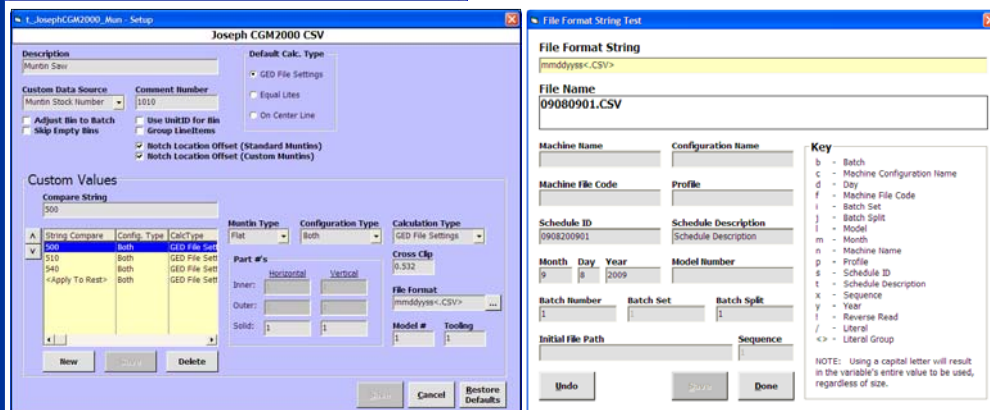

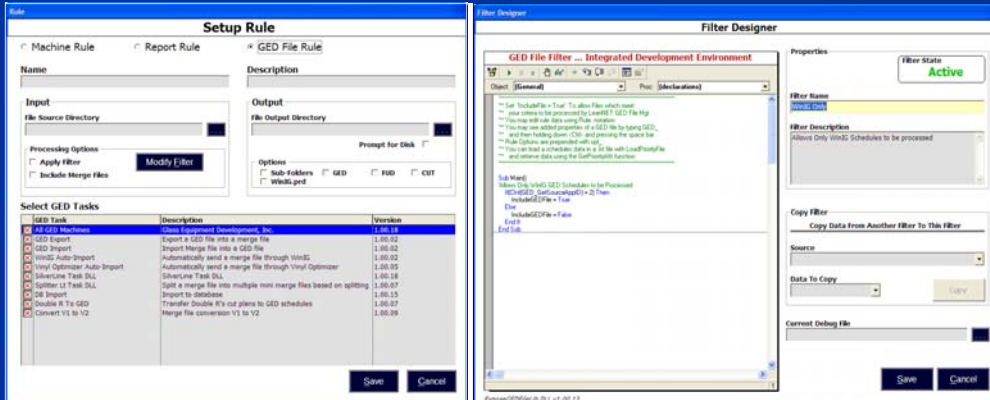

BENEFITS

- ▶ Easy Integration and Setup. Individual rules allow customer selectivity for file, machine interfaces and Report and Label Generation.
- ▶ Adaptable; each rule can be specifically tailored to meet processing rules and interface constraints and formats.
- ▶ Simplifies Operation; GED's "Hide" process allows File Manager to automatically process selected rules while staying out of the way of other applications.
- ▶ Improves Process Integration. One application now provides standard and custom interface solutions for machinery and Report / Label generation along with Electronic File Generation.
