

# FS-7000 FIBERGLASS AUTOMATED ASSEMBLY SYSTEM

This automated, high-volume squaring system simultaneously applies adhesive and fastens corners of the fiberglass frame or sash assembly, and is 2x faster than today's alternative processes.

## FEATURES

- ▶ Fully automated loading and ejection system
- ▶ Automated mechanical fastening
- ▶ Independent metered material dispense for every corner
- ▶ Heavy-duty mechanical design with fully enclosed ball screws for positioning
- ▶ High-speed corner cooling technology
- ▶ State-of-the-art Allen-Bradley® electronic system
- ▶ Designed and manufactured in the USA

## BENEFITS

- ▶ Increases production; assures quality; reduces handling
- ▶ Instant structural integrity
- ▶ Provides accurate material application while reducing waste
- ▶ Assures highly accurate finished window sizes
- ▶ Achieves quicker green strength; improves throughput, increasing efficiency
- ▶ Versatile and simple to operate
- ▶ Will provide long-term continual operation with minimal maintenance and perpetual availability of parts
