

SIGMA 7000 AUTOMATED FRAME WELDING/CLEANING SYSTEM

The SIGMA 7000 Automated Frame Welding/Cleaning System is capable of producing three vinyl frames every two minutes with one operator.

It is the fastest and most compact system available in the market today.

FEATURES

- ▶ Automatic pass thru from welder to cleaner with multilevel stacker
- ▶ Allen-Bradley® electronics systems
- ▶ Parallel welding for symmetric welds
- ▶ Multi-level fixturing with independent referencing
- ▶ Fully programmable cleaner with state-of-the-art electronics system
- ▶ Heavy duty mechanical design with fully enclosed ball screw for sizing on welder and cleaner
- ▶ Designed and manufactured in the USA

BENEFITS

- ▶ Reduces handling and increases efficiency while minimizing labor and floor space while maximizing output
- ▶ Versatile and simple to operate
- ▶ Increases weld strength and more consistent cleaning
- ▶ Increases throughput and ensures accurate welding
- ▶ Provides both cleaning and fabrication operations
- ▶ Assures accurate finished sizes for single and multistack configurations
- ▶ Will provide long term continual operation with minimal maintenance and perpetual availability of parts

GIVING YOU GREATER CONTROL THAN EVER BEFORE
