

6000 GEN 4 GLASS CUTTING SYSTEM

The 6000 Automated Glass Cutting System provides improved quality and productivity with high throughput capacity and the industry's fastest total cycle time. For up to 108" x 144" x 5/8" glass sheets.

SYSTEM SOFTWARE

System software provides numerous options for sorting - including window line, tempering, beveling, laminating and 3M™ Accentrim™ Products.

FEATURES

- ▶ Highly precise
- ▶ High speed glass cutting, 5650 inches/min bridge speeds
- ▶ Unlimited shape capabilities
- ▶ Fully integrated GED optimization software, maximizes glass utilization
- ▶ Integrated one-touch remake capability, lite automatically placed into sequence
- ▶ Fully integrated with other GED WinSystem1® software modules

BENEFITS

- ▶ Provides accurate and repeatable cut glass lites shift after shift
- ▶ Increased throughput equals more lites at the end of a shift
- ▶ Squares, rectangles and other shapes all optimized and cut simultaneously
- ▶ Highest yield with the least amount of scrap
- ▶ JIT remakes are optimized instantly with a push of a button
- ▶ Seamless integration of glass types and post-processing

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
