

CLEANCUT i-3 CUTTING & EDGE DELETION SYSTEM

Automated glass cutting systems provide improved quality and productivity with high throughput capacity and the industry's fastest total cycle time.

SYSTEM SOFTWARE

provides numerous options for sorting — including window line, tempering, beveling, laminating and 3M™ Accentrim™ products

FEATURES

- ▶ Dual bridge simultaneous cutting and edge deletion
- ▶ Dynamic operation sequence software
- ▶ Manual Data Input (MDI) can be done "on-the-fly"
- ▶ 360 degree rotating deletion head with self dressing system
- ▶ New optimization system

BENEFITS

- ▶ Industry leading cycle times and highest throughput
- ▶ Patent-pending routine for choosing the fastest way to process each sheet
- ▶ Continue cutting, edge deleting, and breaking out while inputting remakes, rush orders, etc. This means more throughput and flexibility
- ▶ GED exclusive design gives freedom to delete in any direction and adjust wheel speed for changes in wheel diameter. This means the best quality deletion possible for greater IG quality
- ▶ Greater yields and more flexibility of operation to fit any customer's cutting needs

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
