

COLONIAL MUNTIN MACHINE

The GED Colonial Muntin Machine dramatically increases the number of muntins you produce. It seamlessly integrates with the LeanNet® Software Platform.

3 AXIS SERVO SYSTEM

Five punching heads move to position automatically for fast and accurate production

FEATURES

- ▶ High speed production
- ▶ Machine completes all calculations and automatically moves all punches
- ▶ Simple-to-use design and interface
- ▶ Highly accurate
- ▶ Custom muntin capability
- ▶ Batch or sequential mode

BENEFITS

- ▶ In a typical eight-hour shift this machine can cut and notch 1500-2000 bars, with only one operator
- ▶ Produces a consistently higher quality grid without scrap caused by operator error
- ▶ Takes over the technical work providing easy-to-use operation
- ▶ Accurate bar length, notching, and pieces completed in the proper sequence, time after time
- ▶ Custom notch locations defined through WinIG® for non-symmetrical grid patterns
- ▶ Flexibility to fit any production system

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
