

HOT MELT PUMPS

GED pumps are the most efficient and rugged on the market. Specifically designed for IG production, they have features that give you years of accurate and dependable performance

EXCLUSIVELY DESIGNED FOR IG

High flow rate pumping at low temperatures. Durable design for real world production.

FEATURES

- ▶ Designed for Intercept® or handgun systems
- ▶ Multi-zone electronic temperature monitoring system
- ▶ Automatic overheat monitoring
- ▶ Automatic preheat routine
- ▶ Material level sensing system

BENEFITS

- ▶ Precise control and rugged design for long-term dependability
- ▶ Precision control throughout the system ensures proper material flow
- ▶ Improved uptime and consistent material quality
- ▶ No delays, 'wait time' at the start of each shift
- ▶ Visual cue for operator to change barrel reduces possibility of material outage in the middle of a shift

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
