

OVEN/ROLL PRESS i-3

One of the fastest, most energy-efficient ways to produce IG units, the GED Oven/Roll Press offers significant energy savings: 50% over other high efficiency ovens.

HIGH INTENSITY INFRARED EMITTERS

Ensure even heating across the length and width of every unit with just a fraction of the energy.

FEATURES

- ▶ Automatic thickness adjustment
- ▶ Three operating modes
- ▶ Pre-set recipes for various types of units
- ▶ Gold-plated high efficiency IR emitters
- ▶ Ceramic rollers
- ▶ No blowers
- ▶ Outside access for electrical connections and drive train

BENEFITS

- ▶ Provides continuous operation in 3 operating modes to virtually eliminate interruptions
- ▶ Manual, semi automatic, or full automatic modes to fit any need
- ▶ Optimal heat and speed settings for each type of IG unit and sealant type - including adjusting for Low-E glass units
- ▶ Shape of the emitters and the gold plating direct energy to the seal line for consistent wet-out using less energy
- ▶ Highly precise rollers that can be quickly shut down without warping
- ▶ Reduces energy costs and noise levels
- ▶ Components are located outside the heated section for longer life and reduced maintenance and downtime

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
