

STAINLESS STEEL GLASS WASHER

Revolutionary design improves washing and drying. Stainless steel throughout ensures long life performance. 100% non-reactive materials used throughout washer.

FLOW METERS

Monitor and control water flow to meet manufacturers' specifications and reduce water consumption.

FEATURES

- ▶ Low profile washer design
- ▶ 100% stainless steel construction
- ▶ Simple (Buna-n) ring roller drive system
- ▶ Fully brushed pre-wash section
- ▶ Super Scroll™ Quick Clean-Out System (patent pending)
- ▶ Revolutionary air knife design

BENEFITS

- ▶ Permits visualization of entire processing area by operators
- ▶ Fully DI compatible; eliminates corrosion over time
- ▶ Simple, safe, easily replaceable drive belts. No dangerous old chain driven rollers
- ▶ Removes all traces of Lucor™ and dust prior to wash
- ▶ Permits easy removal of broken glass; no need to shut down washer and clean out broken glass
- ▶ Full length of washer can now be utilized. Eliminates old method of loading glass at 90°

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
