

SMART LINEAR SEALANT EXTRUDER i-3

Smart Linear Sealant Extruder provides precise, consistent application of sealants. The controlled system delivers the right amount to the right location.

PRECISION GEAR PUMP

Eliminates pressure spikes and reduces inconsistencies due to material viscosity, air pressure or ambient temperature. Provides precise metering of sealant where it's needed.

FEATURES

- ▶ Fully automatic changeovers
- ▶ Multi-nozzle desiccant system
- ▶ Highly accurate, precise gear pump design
- ▶ Controlled product application
- ▶ Touch screen with simple to use interface
- ▶ Computer controlled application metering and readout

BENEFITS

- ▶ Easy to use with no downtimes
- ▶ Fewer delays due to spacer size changes
- ▶ Provides material savings and consistent high quality; eliminates compensators
- ▶ Applies sealant and desiccant to within 0.1 grams/foot of desired thickness for improved quality and cost savings
- ▶ Provides easy set-up, operation, maintenance and trouble shooting
- ▶ Ensures quality control and tracking throughout the shift

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
