

# TWO TONE MUNTIN MATERIAL AND PROCESS

New patented product to fabricate embossed two tone muntins. Adding the new material to custom product offerings couldn't be easier!

## FEATURES

- ▶ Over twenty combinations of solid colors and wood grains are available for GED's Intergrid® and ContourGrid™ Muntin Systems
- ▶ New UV ink fusion technology passes Canadian fog and UV exposure testing
- ▶ Stunning visual design of wood grains never before available
- ▶ Patented process speeds production
- ▶ Custom colors and wood grains available
- ▶ Coil loading system

## BENEFITS

- ▶ Allows grid production to be integrated with other steps in IG fabrication using GED's WinSystem1® Software Platform
- ▶ Maintains IG airspace integrity
- ▶ Fabricators now have another option to differentiate their product offerings
- ▶ Competitively priced with other two tone solutions currently available
- ▶ Customize a wood grain or color to match your vinyl or wood product line
- ▶ Virtually eliminates scrap and drop

GIVING YOU GREATER CONTROL THAN EVER BEFORE.
