## **GED to relocate vinyl equipment manufacturing to Twinsburg, Ohio headquarters**

**TWINSBURG, OH** – January 29, 2007 – GED Integrated Solutions announced today, in an effort to better serve customers, that its vinyl equipment manufacturing operations will relocate from Hauppauge, New York to its Twinsburg, Ohio corporate headquarters.

“We sell to our customers the benefits of integrating the glass and vinyl fabrication sides of their operations and incorporating lean manufacturing practices wherever possible. We’re putting those same practices to work for us and for the benefit of our customers,” said Ron Auletta, president and CEO of GED Integrated Solutions. “By placing operations under one roof, we improve key areas of our process including research and new product development, manufacturing and customer service.”

As of April 1, all vinyl equipment manufacturing will take place in the Ohio facility. Customer support services will remain unchanged – all inquiries should continue to be directed to the Phone Tech Support Group at (330) 963-5401.

For more information about the relocation, contact Pete Chojnacki, director of marketing for GED at (330) 487-5052.

### **About GED Integrated Solutions**

GED Integrated Solutions manufactures fully integrated insulating glass and vinyl window and door fabrication systems including the revolutionary Intercept® i-3 IG spacer frame production system. The company’s i-3 platform works with LeanNet communications software to integrate every facet of a plant’s operation, increasing profit and getting orders out the door faster. GED’s commitment to innovation that addresses its customers’ needs is evidenced by the fact that 18 of the top 20 manufacturers utilize GED’s equipment and software solutions.
